01 — DESIGN PHILOSOPHY

Precision Dark

Every design decision should feel like a researcher made it: deliberate, evidence-backed, zero decoration without purpose. The aesthetic is dark instrument panels, amber signal lights, and monospaced data — not a startup, not a SaaS template.

 THE GRID IS STRUCTURE Everything sits on a grid. The grid motif — cells lighting amber — is your visual metaphor for finding the gap. Use it in loaders, empty states, and background textures.	AMBER = SIGNAL Amber is never used for prettiness. It means: active, found, important, actionable. If it's amber, the user needs to pay attention. One accent, total discipline.	DATA SPEAKS IN MONO Numbers, labels, timestamps, status codes — all monospaced. It signals precision. DM Mono for data, Syne for ideas. Never mix them up.
--	--	--

02 — COLOR PALETTE

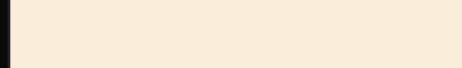

Restrained by design

Three neutrals, one signal. Every other color exists only for semantic status inside product UIs — never for decoration.

Foundation

							
#0a0a0b Base	#111113 Surface	#18181c Raised	#1f1f24 Hover	#222226 Border	#4a4845 Muted	#8a8782 Secondary	#f0ede8 Primary

Signal — the only brand accent

		
#e8a237 Signal	#ba7517 Dark amber	#faeeda Amber 50

Semantic — product UI only

CONFIRMED #4caf6a · validated gap	REJECTED #e55a4e · insufficient signal	IN ANALYSIS #5b9bd5 · processing	IDLE neutral · queued

03 — TYPOGRAPHY

Two fonts. Three roles.

Syne carries authority. Instrument Serif adds warmth for editorial moments. DM Mono signals data and precision. Never use a fourth font.

Syne 800 · Hero
clamp(3rem,8vw,7rem)
tracking -0.025em

We know.

Instrument Serif italic · Quote
clamp(1.6rem,3vw,2.8rem)
tracking -0.01em

From assumption to evidence.

Syne 700 · Section heading
1.6-2.5rem
tracking -0.02em

Active Initiatives

Syne 400 · Body / Prose
1rem · line-height 1.8
color: text-secondary

We scan ecosystems, identify gaps, and build.

DM Mono 400 · Labels / Data
0.7-0.85rem
tracking 0.1-0.2em

NVL-0042 · confidence: 94% · sector: dev-tools

04 — COMPONENTS

Sharp, functional, no rounding

Zero border-radius on interactive elements. Borders not shadows. Amber only on active/primary states.

05 — MOTION + INTERACTION

Deliberate, never decorative

Motion signals meaning. Hover reveals intent. Nothing should move without a reason.

Hover — border reveal

`border-color 0.2s ease · amber`

On hover, borders intensify to amber. The element feels like it's been selected for analysis. Use on cards, rows, nav items.

Page entry — stagger up

`translateY(24px) -> 0 · 0.7s ease · stagger 0.1s`

Content rises from slightly below with a delay chain. Feels like data populating a dashboard. Never bounce, never overshoot.

Top-border reveal on hover

`scaleX(0->1) · 0.35s ease · transform-origin: left`

The amber top-line sweeps in from the left on hover. Feels like a scan. Signature micro-interaction for the brand.

Grid cell pulse — loading

`opacity 0.3->1->0.3 · 1.4s · stagger per cell`

When scanning/loading, the 2x2 gap-mark grid pulses cells in amber sequentially. Instantly recognisable as 'Noventra is working.'

06 — PRODUCT UI ANATOMY

How every Noventra product is structured

Every product we ship should feel like it came from the same lab. These structural rules are non-negotiable.

TOP BAR	Dark bg · logo mark 20px · product name in DM Mono · amber indicator ·...
LEFT RAIL	240px · bg-2 · icon + DM Mono labels · active item gets amber left-bor...

07 — DESIGN RULES

Non-negotiable principles

R1 No rounded corners on interactive elements. Buttons, inputs, cards, modals — all sharp. Rounded corners say 'friendly app.' Sharp says 'precision instrument.'

R2 The gap-mark motif appears in every product. Loading states, empty states, onboarding — the 2x2 amber grid. Users learn to associate it with Noventra.

R3 Numbers always in DM Mono. Any number, stat, percentage, timestamp — always monospaced. Makes data scannable and identifiable as 'Noventra data.'

R4 One amber thing per view. If everything is amber, nothing is. The most important action or status on any screen gets amber. Everything else is neutral.

R5 Borders over shadows. Depth is communicated by border weight and background shade — never drop shadows. Shadows are decorative; borders are structural.

R6 Dark first, always. Every product defaults to dark mode. Light mode can exist but is never the default. We are a research lab, not a lifestyle brand.
